- To install SentiStrength within the plugin simply copy the main jar file into the lib folder and place the data files in the resources folder. The jar file should be called SentiStrengthCom.jar if this is not the case then either rename the file or edit the creole.xml file to match the name of the jar file.

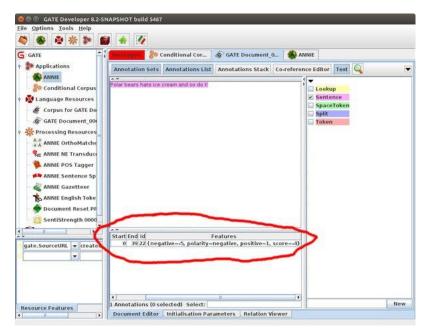

- While loading Sentistrength PR, in options list, type any of the parameters given in the manual.

G Parame	eters for	the new S	SentiStrength				
Name:							
Name	Туре	Required	Value				
< dataDir	URL	~	file:/C:/Program%20Files/GATE_Developer_8.1/plugins/SentiStrength/resources/				
(2) dalag	ouoiean	~	faise				
ontions	List						

- You need to have Sentence annotations. Add the Sentistrength PR to the end of ANNIE

- Select "Sentence" annotations, turn on the "Annotations List" and you should find the output.

P.S. While testing (Win/Linux) some features were not loading/working immediately. In case of troubleshooting try to reload PR with different parameters in option list.
